

PCR COVID-19 Tests at Iberostar Hotels

in Mexico, the Dominican Republic, Jamaica, Brazil and Peru

In addition to all the hygiene and safety measures implemented by Iberostar, our guests will now be able to take the PCR COVID-19 test directly at the hotel before returning to the U.S. for an additional fee, payable by credit card. All international air passengers are required to take a viral test within the three days of departure and provide written documentation of their laboratory test result to the airline, showing proof of a negative coronavirus test before boarding their flights. Guests will be advised upon arrival regarding the details of the testing process and schedule the appointment in advance through the doctor at each hotel. Results will be sent by email within 24 hours.

Costs per test:
